

HARSHIT KUMAR SHARMA

Software Engineer | Full Stack Developer

☎ +91-8868801024 | ✉ harshitsharma363978@gmail.com | 🔗 LinkedIn | 🌐 GitHub | 🌐 Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building AI-powered web applications using **Next.js, React.js, Node.js, Express.js, MongoDB, TypeScript, and JavaScript**. Experienced in developing secure authentication systems, REST APIs, database-driven applications, and responsive user interfaces through real-world projects. Proficient in integrating AI services, deploying applications on cloud platforms, and building clean, scalable, and maintainable software.

EDUCATION

Moradabad Institute of Technology (AKTU) <i>B.Tech in Computer Science & Engineering</i>	Aug 2023 – Jun 2026 <i>Moradabad, Uttar Pradesh</i>
Vikas Institute of Engineering & Technology (BTEUP) <i>Diploma in Computer Science & Engineering</i>	Aug 2021 – Jul 2023 <i>Gorakhpur, Uttar Pradesh</i>

EXPERIENCE

Ducat India, Noida , Sector 16 <i>MERN Stack Development Trainee</i>	Sep 2025 – Present <i>Noida, India , Remote</i>
– Undergoing structured MERN Stack Development training with hands-on learning in MongoDB, Express.js, React.js, and Node.js. – Developing practical understanding of full-stack web development, including responsive frontend development, backend APIs, database integration, and client-server communication. – Strengthening skills in JavaScript, React.js, Node.js, Express.js, MongoDB, REST APIs, and CRUD operations through project-based development and practical assignments. – Applying software development practices including Git/GitHub, API testing, debugging, authentication, and responsive UI development while building web applications.	
Techiguru <i>Full Stack Developer Intern</i>	April 2024 – June 2024 <i>Remote</i>
– Gained hands-on experience with the MERN stack by working with React.js, Node.js, Express.js, and MongoDB in a practical development environment. – Strengthened full-stack development skills through responsive frontend development, REST APIs, database integration, authentication, CRUD operations, and client-server communication. – Collaborated in a remote development environment while applying Git/GitHub workflows, debugging, API integration, code organization, and deployment concepts through project-based development tasks.	

PROJECTS

INTERVO - AI Interview Preparation Platform

[Live Demo](#) | [GitHub](#)

- Built a full-stack AI Interview Preparation Platform using **Next.js 15, TypeScript, MongoDB Atlas**, and **Gemini AI** that helps users practice interviews, receive AI-generated feedback, and track their interview performance through a personalized dashboard.
- Implemented secure **JWT Authentication, Google OAuth**, protected routes, REST APIs, and MongoDB data models to manage user accounts, interview history, profile management, and application data.
- Integrated an **AI Readiness Test** module that generates company-specific assessments from uploaded resumes or custom topics using Gemini AI, evaluates user responses, calculates scores, stores assessment history, and presents performance insights through an interactive dashboard.
- Deployed the application on **Vercel** with production environment configuration, integrated **Cloudinary** for profile image management, and configured cloud services to ensure reliable application deployment and performance.

- Built a full-stack **Career Preparation Platform** using the **MERN stack** that helps users practice aptitude, access technical learning resources, and prepare for job opportunities through a personalized dashboard.
- Implemented secure **JWT Authentication**, role-based authorization, protected routes, REST APIs, and MongoDB data models to manage user accounts and application data.
- Developed core interactive modules including **Aptitude**, **Learning**, **DevHub**, **Job Portal**, and a personalized **Dashboard**, with an AI-powered **Ask** feature to support learning and career preparation.
- Designed responsive user interfaces using **React.js** and **Tailwind CSS**, integrated MongoDB for CRUD operations, and optimized application workflows for a smooth user experience.

- Built an AI-powered platform using **Next.js**, **TypeScript**, **Gemini AI**, **Axios**, and **Cheerio** to analyze the alignment between advertisement copy and landing pages, helping identify conversion-impacting mismatches.
- Implemented automated landing page fetching and HTML parsing using **Axios** and **Cheerio** to extract structured page content for AI-driven analysis.
- Integrated **Gemini AI** to evaluate persona alignment, offer consistency, product framing, social proof, objections, and above-the-fold continuity, generating actionable optimization insights.
- Generated structured fit scores and AI-powered optimization recommendations through a responsive **Next.js** and **Tailwind CSS** interface, and deployed the application on **Vercel** for production use.

- Built a full-stack **Employee Shift & Attendance Management System** using the **MERN stack** to streamline employee records, shift scheduling, attendance tracking, leave management, and daily workforce operations.
- Implemented secure **JWT Authentication**, role-based access control for **Admin**, **Manager**, and **Employee** modules, along with REST APIs and MongoDB data models to manage application data securely.
- Developed core modules for employee management, attendance, shifts, leave requests, dashboard analytics, and statistics to simplify workforce management through a centralized platform.
- Designed responsive management interfaces using **React.js** and integrated **MongoDB** for CRUD operations to deliver an organized and user-friendly management experience.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, SQL
Web Technologies: HTML5, CSS3, React.js, Next.js, Tailwind CSS, Bootstrap, Node.js, Express.js, REST APIs, Axios, Context API
Databases: MongoDB, MongoDB Atlas, Mongoose, MySQL
Authentication & Security: JWT Authentication, Google OAuth, Role-Based Access Control (RBAC), Middleware
Tools, AI & Platforms: Git, GitHub, Postman, VS Code, Figma, Gemini AI API, OpenAI API, Cloudinary, Vercel, Render, GitHub Pages, Cheerio
Core Concepts: Data Structures Algorithms, CRUD Operations, MVC Architecture, Authentication Authorization, Responsive Design

CERTIFICATIONS

100 Days of Code: The Complete Python Pro Bootcamp — Udemy	Jul 2026
Figma UI/UX Design: Web and App Design with Projects — Udemy	Jul 2026
PBEL Equivalent to Virtual Internship – Artificial Intelligence — IBM Developer Skills Network	Jul 2025
SQL and Relational Databases 101 — IBM Skills Network (Cognitive Class)	Feb 2026

RESEARCH PUBLICATION

Skill-Up: An All-in-One Platform for Student Skill Development
International Journal of Sciences and Innovation Engineering (IJSI)
Volume 3, Issue 4, April 2026

Pages 2823–2837
